DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Richardson, U.S. Patent No. 5,490,216. Referring to claims 1-3, Richardson discloses a software registration system wherein upon the execution of a software program or digital data a code portion within the program generates a registration number based on license information, which meets the limitation of creating license information as information in the form of a run-time read module. The generated registration number is checked with the licensor for validity and upon validation of the registration number the full version of the software program is run. In the event that the registration number is found to be invalid a demo version of the software program is run (Abstract, Fig. 2c).
